

IMPLEMENTER GUIDE

V/TO

TOOLBOX

Revised August 28, 2020

INTRODUCTION TO THE TOOL

INTRODUCTION

Taught during Vision Building Days 1 & 2, the objective is to teach the 8 questions and get them all on the same page with their vision.

PREPARATION/MATERIALS

- Watch the V/TO video.
- Review this guide and bring to the session.

TIME

30 minutes

LEADERSHIP TEAM MANUAL (LTM) PAGES

Toolbox, pages 7 and 8

CONTEXT AND TEACHING

Turn to pages 7 and 8, in the Toolbox Section of your LTM

- This is the Vision/Traction Organizer™ or V/TO for short
- This is a 2-page document where we keep the 8 questions that help crystalize your vision
- What are the Eight Questions?
 1. What are your Core Values?
 2. What is your Core Focus™?
 3. What is your Ten-Year Target™?
 4. What is your Marketing Strategy?
 5. What is your Three-Year Picture™?
 6. What is your One-Year Plan?
 7. What are your Quarterly Rocks?
 8. What is your Issues List?
- I'm going to walk you through each question, one at a time beginning with:

Question #1 - What are your Core Values?

- Core values are just an essential set of guiding characteristics that define who you are at the core and what you want from the culture of your organization.
 - I'm going to take you through a discovery exercise to help you discover the true Core Values of your unique organization.
- Then later in the People Component, I'll explain to you exactly how we're going to use your Core Values to
 - Attract great people to your organization (people that fit your culture, the kind of people you want to be surrounded with) and
 - Repel people who aren't a great fit for your culture.
- That's Core Values

DIAGRAMS

CONTEXT AND TEACHING

Question #2 – Core Focus?

- The second question on the VTO is what is your Core Focus.
- Core Focus is the sweet spot of your organization - It has been called a million things in the history of business.
 - A lot of people call it Vision statement. Some people call it mission statement. Stephen Covey calls it Voice. Jim Collins called it Hedgehog concept.
- I apologize for throwing another consulting term at you. We call it Core Focus. It comes from your core.
- Once it's clearly defined and articulated, the trick is to stay laser focused within that Core Focus so that you're always working within your sweet spot.

Question #3 - What is your Ten-Year Target?

This is just a long-range big goal for your business.

- The time frame is flexible.
 - Anything from five to thirty years out.
- It is a clearly articulated, simple number one business goal for your organization.
 - It gets you all on the same page with where you are going long term.
- Once that's crystal clear, we move on to question #4.

Question #4 – The Marketing Strategy?

- Your marketing strategy is simply designed to get you all on the same page with who you should talk to and what you should say to get the biggest return on your investment in precious sales and marketing energy.
- There are four parts to Marketing Strategy.
 1. Target Market
 2. 3 Uniques
 3. Proven Process
 4. Guarantee

DIAGRAMS

CONTEXT AND TEACHING

- The Target Market is getting you all to agree on the ideal prospect.
 - The demographic, geographic and psychographic profile of the kinds of people or companies you should be laser focused on proactively selling and marketing to.
 - Once that's clear, the rest of the marketing strategy is simply your message to those ideal prospects.
- 3 Uniques are just three differentiating characteristics.
 - Three things about your organization that make you different and better than the competition – it sets you apart from the competition.
- The Proven Process is a one-page visual illustration of the way you take care of your customers, from the minute they start thinking about doing business with you to the time they are longtime satisfied business partners of yours.
- The Guarantee is just a pledge or a promise that reduces the fear of adoption.
 - It eliminates objections that you might face in the sales and marketing process.
- These four components make up the Marketing Strategy.
- Once you are all 100% on the same page with your Core Values, your Core Focus, your Ten-Year Target, and your Marketing Strategy:
 - You will know who you are at the core,
 - What you love to do and are best at with your Core Focus,
 - Where you are going long term and
 - How you are going to get there with your Marketing Strategy.
 - We then crystallize the Vision for the organization.
- Bring it down to the ground and start making it real with your Three-Year Picture™.

DIAGRAMS

CONTEXT AND TEACHING

Question #5 – 3-Year Picture™?

- This is not a detailed three to five-year strategic planning process we're going to go through.
 - All we are trying to do is get every member of your team to crystallize and visualize exactly what this company needs to look like 3 short years from now.
 - If you can all see the same thing in your mind's eye, the chance you're going to achieve that Vision becomes significantly higher.
- We start by quickly defining your revenue, profits and measurables.
 - What does this company need to achieve three years from now to lay the foundation for your Ten-Year Target?
- Then you'll see 5-15 bullet points underneath the question, "What does it look like?"
 - This is where we work together to paint a clear picture of what the organization needs to look like three short years from now on the way to achieving your Vision.
- When that Three-Year Picture™ is crystal clear, there are two great benefits.
 - When you can all see the same Three-Year Picture™ in your mind's eye, the chances that you are going to achieve it are so much stronger!
 - It also sets you up for great one-year planning.
- We can then turn the page to the Traction side of the document and REALLY bring that Vision down to the ground and prioritize and plan.

DIAGRAMS

CONTEXT AND TEACHING

Question #6 – 1-Year Plan™?

- The first thing we do is agree on your One-Year Plan™.
 - You'll notice we use the same predictions here – revenue, profit and measurables.
 - What are we going to achieve this year or next year to lay the foundation for achieving your Vision?
- Then we work to agree on 3 to 7 priorities. We call them goals for the year.
 - We focus on 3 to 7 goals – not 23, because when everything is important, nothing is important.
 - One of the phrases we use a lot when we are implementing EOS is, "Less is More."
- We've now crystallized and made predictions of what the revenue, profit and measurables need to be this year. We've set 3 to 7 clear, aligned goals.

Question #7 – Quarterly Rocks?

- Now we move to the next section of the VTO. We call these Rocks.
- Rocks are just 90-day business priorities – getting us all 100% on the same page with what's most important over the next 90 days. Creating a 90-Day World™ for the organization.
 - We start by predicting revenue, profit and measurables.
 - Then we identify 3 to 7 priorities for the company over the next 90 days.
 - Ultimately 3 to 7 priorities for each of you as well.
 - It creates discipline, focus and accountability so we are executing on our Vision every 90 da

DIAGRAMS

CONTEXT AND TEACHING

Question #8 - What is your Issues List?

- With that, the last question on the VTO is what are your Issues?
- We compile an Issues List.
 - I think I mentioned earlier that when your VISION, PEOPLE and DATA components are strong, this organization is going to become transparent.
 - You are going to have a lot of impurities, imperfections, needs, challenges and obstacles.
- Once we get the Issues out of your head and onto your Issues List, we've answered the 8th question.
 - You're all on the same page.
 - It's a simplified approach to strategic planning.

DIAGRAMS

CONCLUDE

- Those are the Eight Questions and that is your V/TO.
- You're all on the same page.
- It's a simplified approach to strategic planning.
